Subject: Subsidence West Ridge

Pam,

yesterday Steve F and Joe went out with Dave S. at West Ridge. They found a new hunting cabin that could be on existing permitted land or on the new leases. There is no mention of the cabin in the MRP. Possible oversight by the mine.

I call Dave S. and told him that he needed to follow up. R645-301-525.130 cover presubsidence surveys.

Dave will get the GPS coordinates and plot the location. I will keep you advised.

Wayne
